Cotton Canvas Tarps/Fabrics

cotton canvas tarps made from natural cotton canvas fabrics. Thick texture, hard and wear-resistant, with good waterproof, mildew and dust resistance. Colors: Tan, White, Brown, Green, Olive Drab. Tarp's finished size is up to 3% - 5% smaller after hems and seams. they are great for construction tarps, oil field equipment tarps, power generation equipment tarps. etc

Products	Yarn Count	Width(cm)	Gram Weight(g/m ²)	Density	Thickness (mm)	Warp and weft density	Feature
Cotton Canvas Fabrics	10S	205-208	600	4*4	1.1		ANTI-UV, Tear-Resistant, waterproof
	10S	205-208	620	4*4	1.1		
	10S	205-208	720	5*6	1.3	33/19	
	10S	205-208	470	3*3		39/24	
	21S	205-208	620	8*8			
	21S	205-208	720	10*10			

Polyester Canvas Tarps/Fabrics

Polyester Canvas Tarp For Container Cover Super strong heavy duty polyester canvas tarps made from UV resistant and tear resistant polyester canvas with durable silicone waterproofing. Tarp's finished size is up to 3% - 5% smaller after hems and seams. Polyester canvas tarps is close to waterproof and highly water repellent. No odor, wax or color dye rubbing off. They are great for container cover , carport canopy, patio tarps and equipment tarps.

Products	Yarn Count	Width(cm)	Gram Weight(g/m2)	Density	Tear strength (N)	Warp and weft density	Feature:
Polyester Canvas Fabrics	21S	193	310	2*2			Good toughness, resistance to bending and abrasion, no pungent odor. Industrial waterproof, not easy to seepage of stagnant water, strong tear resistance 2x Stronger than cotton canvas
	21S	193	420	3*3			
	21S	90-265	500	4*4	2500N/1500N	62/30	
	21S	205-208	630	6*6	2650N/2250N	45/25	

Vinyl Tarps/Fabrics

PVC coated waterproof canvas has high UV resistance, high tear resistance and durability, and high waterproof. Adopt high-temperature heat-sealing process to hold the edge, the link is tight, no gap, no pinhole and no water leakage. Thick fabric, strong and durable, product color: tan, white, brown, green, olive, etc. Flame retardant can be added according to customer requirements to increase flame retardancy

Products	Yarn Count	Width(cm)	Gram Weight(g/m2)	Density	Thickness (mm)	Tear strength (N)	Feature
Vinyl Tarps Fabrics		150-200	560	6000*6000	0.42	1200N/650N	100% waterproof, UV resistant, mildew resistant, oil/grease resistant, and resilient to tearing, making it great to be used outdoors as well as indoors
		150-183	660	9000*9000	0.55	1500N/1050N	
		200	500	6000*6000	0.4	800N/500N	
		200	620	9000*9000	0.45	1200N/650N	

Mesh Tarps

Our Mesh Tarps are also being used in construction sites and for various outdoor activities. Made of the best quality materials, these privacy screens are second to none. The black mesh tarp not only functions as a shade from the sun, it can also protect you from falling debris.

Our mesh tarps offer long-term solution when used as sun shade canopies. They also reinforce canopy tents. They can be placed on the sides of canopies for stability during windy days. Grommets are placed on the entire perimeter of each mesh tarp.

Products	Material	Gram Weight:	Color	Uses	Feature
Mesh Tarps	100%HDPE/PP	20-260GSM	Black, blue, gray, olive green, tan, white, etc.can be customized according to user requirements	sunshade shed, amusement facility shade shed, greenhouse shade shed, cowshed and so on.	High anti-ultraviolet, durable, light weight, high strength of the tarpaulin, novel appearance, colorful tarpaulin, self-cleaning, anti-fouling, anti-aging, high color fastness of the tarpaulin, long life, high tear resistance, resistance to peeling Features

		20-260GSM			

Tents

The tent is made of silicone tarpaulin, cotton tarpaulin or PVC tarpaulin. Using hot-dip galvanized steel pipe, strong and durable.

Product color: light color, color can be customized

It is 100% waterproof, tear-resistant, and can be environmentally controlled in any climate. It can be moved to any position, can be repositioned 100%, and the free span space is not obstructed.

The tent materials include cotton tarpaulin, polyester tarpaulin, pvc waterproof coating flame retardant cloth and so on.

It can meet the basic properties of rainproof, ventilation, heat insulation, wind resistance, snow disaster, wind, light transmission, and aging resistance.

Products	Material	Side height	Top height	Number of people	Thickness (mm)	Tear strength (N)	Feature
Tents	silicone tarpaulin, cotton tarpaulin or PVC tarpaulin	1.8M	2.7M	8	0.42	1200N/650N	100% waterproof, UV resistant, mildew resistant, oil/grease resistant, and resilient to tearing, making it great to be used outdoors as well as indoors
		1.8M	3.1M	16	0.55	1500N/1050N	

Sales Network

For domestic sales: the company insists on taking customer as orientation and pretty focus on rising of sales ability. With over 20 years' efforts, the company has established a nationwide strong market system to all city and country.

For oversea sales: for years, the company has focused on opening up of international market and the ventilated water-proofs we produce are made by international level excellent skill and advanced technology and have been imported to 20-odd countries and districts, such as Japan, America, Southeast Asia, and Western Europe.
